

PROFILE

Highly motivated construction professional with extensive experience delivering projects from pre-construction through to completion. Strong proficiency in PYTHA 3D CAD supports accurate 3D modelling, visualisation, and drawing development for planning, coordination, and client communication. Custom Python scripting streamlines documentation workflows by automating material take-offs, edge band schedules, hardware lists, and other critical project data, improving both efficiency and accuracy.

Consistently delivers successful projects by building strong relationships with clients and identifying their needs to promote effective solutions. Adept at setting and achieving goals through meticulous planning. Strong listening skills help navigate complex stakeholder environments and avoid internal conflicts through dialogue.

Capable of handling multiple concurrent tasks including advanced 3D modelling in PYTHA 3D CAD, ALPHACAM nesting for CNC production, and Python automation for documentation and reporting. Dedicated to continuous professional growth and embracing new challenges.

EDUCATION

Technology of Civil Construction — Modality Buildings
São Paulo State Technological Faculty (FATEC-SP)
2007 – 2011

Certificate IV in Project Management
Australian Pacific College
2017 – 2018

Diploma in Project Management
Australian Pacific College
2018

Advanced Diploma in Project Management
Australian Pacific College
2019 – 2020

CERTIFICATIONS

PYTHA 3D CAD — Full Training
2023 – 2024

Construction Management Specialization
Columbia University (Coursera)
2023 – 2024

Machine Learning for Trading Specialization
Google Cloud & New York Institute of Finance (Coursera)
2023 – 2024

Investment Management with Python and Machine Learning
EDHEC Business School (Coursera)
2023 – 2024

Google Data Analytics Professional Certificate
Google (Coursera)
2023 – 2024

SKILLS

- Shop drawings & detailing: produce, review, and update drawings for fabrication and installation, ensuring constructability and compliance with specifications;
- 2D and 3D drafting and modelling in AutoCAD, with a strong understanding of plans, elevations, sections, and details;
- Drawing set coordination: align architectural, structural, and services information, resolve clashes, and manage RFIs and clarifications;
- Mark-ups and revision control: incorporate client and consultant feedback, maintain version history, and issue updated drawing packages;
- QA and drawing checks covering dimensions, tolerances, materials, finishes, hardware schedules, and consistency across sheets;
- As-built documentation: capture site changes and prepare accurate as-built drawings for handover;
- Documentation and schedules: prepare material take-offs, edge and hardware lists, and supporting documentation to accompany drawings;
- Proficiency in PYTHA 3D CAD for visualisation and detailed 3D modelling, ALPHACAM nesting for CNC production, and Python scripting to automate drawing-related lists and schedules.

EXPERIENCE

PYTHA Draftsman

Jan 2025 — Present

LSC Fitouts, Australia — lscfitouts.com.au

- Review project documentation (architectural drawings, specifications, and scope) to confirm requirements, finishes, and constructability prior to production;
- Produce and coordinate shop drawings for fitout and joinery packages (plans, elevations, sections, and detailed call-outs) using AutoCAD;
- Develop 3D models and visualisations to support client approvals and improve on-site coordination;
- Interpret and translate design intent into fabrication-ready information, including dimensions, tolerances, materials, finishes, and hardware requirements;
- Prepare ALPHACAM nesting for CNC production and optimise sheet utilisation, labelling, and part organisation for the factory workflow;
- Manage drawing mark-ups and revisions, maintain version control, and issue updated drawing sets to relevant stakeholders;
- Maintain organised drawing registers and file structures (issue sets, revisions, and production packs) to ensure clear communication and traceability;
- Liaise with site teams, subcontractors, and suppliers to resolve clashes and queries and support smooth installation;
- Support procurement and scheduling by preparing material take-offs and tracking key materials and hardware deliveries.

Civil Engineering Technician

May 2021 — Dec 2024

Accent Benchtops, Australia — accentbenchtops.com

- Studied, analysed, and understood all project documents before starting, determining specifications and materials required;
- Ensured plans were correct and constructible, confirming activities were performed within planning;
- Discussed project specifics with contractors and ensured understanding before execution;
- Managed employees through task allocation and supervision;
- Developed and managed budgets consistent with timeline requirements;
- Scheduled and coordinated subcontractors to complete projects within time, budget, and scope;
- Managed permitting and approval phases and ensured all authorisations were received before initiating construction;
- Oversaw ordering and tracking of materials and equipment;
- Developed shop drawings and 3D simulations using AutoCAD;
- Read and interpreted blueprints and drawings to determine specifications and materials required.

Civil Engineering Technician

May 2018 — Apr 2021

Interior Marble, Australia — interiormarbleprojects.com.au

- Studied, analysed, and understood all project documents, determining specifications and materials required for civil projects;
- Ensured plans were correct and constructible within planning;
- Responsible for safety and ensuring WH&S compliance at all times on and off-site;
- Managed employees through task allocation and supervision;
- Developed and managed budgets and scheduled and coordinated subcontractors within time, budget, and scope;
- Managed development and construction timelines and oversaw permitting and approval phases;
- Developed shop drawings and 3D simulations using AutoCAD;
- Read and interpreted blueprints and drawings to determine project specifications and materials.

Civil Engineer Technologist

Mar 2015 — Mar 2016

Lock Engenharia Ltda., Brazil — lock.com.br

- Analysed and understood all project documents, determining specifications and materials for civil projects;
- Ensured constructibility and compliance and discussed project specifics with contractors before execution;
- Responsible for safety and WH&S compliance and managed employees and task distribution;
- Developed and managed budgets and scheduled and coordinated subcontractors;
- Managed timelines and approval phases and oversaw ordering and tracking of materials and equipment.

ACHIEVEMENT

Part of a team that developed a comprehensive task manual documenting all construction details and standards. Result: increased efficiency in construction processes, reducing costs and execution time.

Civil Engineer Technologist

Mar 2012 — Mar 2015

Kross Engenharia, Brazil — kross.com.br

- Planned civil activities and provided management assistance across all project phases from pre-construction to completion;
- Surveyed operations to ensure activities were performed within planning;
- Contracted outsourced service companies, ensuring term, price, and quality;
- Managed development and construction timelines and helped develop and manage budgets;
- Managed approval phases and oversaw ordering and tracking of materials and equipment.

ACHIEVEMENT

Participated in multiple construction tools implementation projects introducing weekly control of critical items, schedule, contract status, change orders, financial control, and photographic reports. Projects became more concise and easier to manage, increasing quality and customer satisfaction.

Civil Engineer Technologist (Intern)

Oct 2008 — Feb 2012

Lock Engenharia Ltda., Brazil — lock.com.br

- Planned civil activities and provided management assistance across all construction project phases;
- Contracted outsourced services and managed timelines and approval phases;
- Managed and supervised employees and helped develop and manage budgets;
- Oversaw ordering and tracking of materials and equipment.

ACHIEVEMENT

Started as engineering trainee and was promoted to Junior Construction Manager based on proactivity, professionalism, and dedication. Participated in SIENGE integrated engineering system implementation, achieving a 30% time-saving in process execution.
